SUBJECT: Sewer Outfall Extension - Wastewater Treatment Plant

In the summer of 1980 the Department of Environmental Quality (D.E.Q.) notified the City of Wilsonville of a problem with foaming at the effluent discharge or outfall of the Wastewater Treatment Plant. The foaming was caused by the outfall discharging to near the surface of the river. The requirement of D.E.Q. was to extend the outfall 40 feet into the river at an elevation some 20± deeper than it is now. The deadline date is October 1, 1982.

The City of Wilsonville has worked toward the goal of accomplishing this task, has procured all necessary permits and requirements of the State and is presently ready for construction. Also the Army Corp of Engineers has stipulated that concrete can only be placed between July 14, 1982 and September 1, 1982.

Recommendation

1. Approve the plans and specifications as submitted.
2. Approve the advertisement to receive bids for the "Sewer Outfall Extension Project."
