FROM: RAY SHORTEN, ACCOUNTING DIRECTOR 

Re: Purchase of Ultrasonic leak detector system.

I have received a requisition from the Public Works Department to purchase a U.G.I. Ultrasonic leak detector system. As this product is manufactured by Moffatt Enterprises in Gladstone, and is only available from this vendor, we would not have to advertise for bids. This equipment is budgeted in the current fiscal year budget in line item 3-55-71025 and funds are presently available for this purchase.

Recommendation:

Approve purchase of above leak detector system from Moffatt Enterprises at a total cost of \$1,995.00.

As a new member of National Utility Contractors Of America. (N.U.C.A.)
We would like to introduce ourselves and let you know what we bring to the
underground industry.

We have developed a new tool for testing pipelines for leaks as they are
being assembled, WITHOUT WATER OR AIR PRESSURE. QUICKLY AND ACCURATELY TO
PROVE HYDROTEST OR AIR TEST BEFORE BURYING PIPE.

By introducing a hybrid Ultrasonic waveform into the pipe as it is being
assembled. Leaks will be detected immediately! Such as Rolled gaskets, Pinched
gaskets, cracks, pinholes, anything that would cause a leak!

Any size pipe or composition of pipe can be tested!

(THIS TOOL PROVES THE VALIDITY OF THE VESSEL!) Such as Tanks, Reservoirs,
Valves, Before installation, Or after.

The same tool detects leaks underground after line is finished. It is
Effective, Inexpensive, Easy to use. Durable, Hand held, Battery operated.
Warranted for one year.

Many contractors say it paid for itself the first day used. If it saves
one leak in advance of Burying it has paid for itself!
It has been in use for 2 years in all areas of the U.S.A. By contractors and
has a good track record.

The present cost \$ 1995.00 (Allow 2 weeks for delivery) We will Ship
next day air to most locations in the U.S.A..If prepaid or C,O,D.Via U.P.S.

At the present time we have many N.U.C.A. members using this tool.
Hoping to serve you and N.U.C.A.

Respectfully

Herman Moffatt
